SUMMARY

As a great communicator, outcome-focused and process-oriented professional with overall almost 2.5 years experience, I am seeking a challenging opportunity to become Software Engineer where my advanced skills, education, extensive training and years of experience fully utilised

EXPERIENCE

Software Engineer
Light Vision Inc   **December 2022 - Present, Seoul, South Korea**

· Extended AI Parking app capabilities through a new feature page developed using Flutter. Seamlessly integrated this functionality into the existing system, enhancing the user experience and customer escalation by 15% providing a user-friendly interface for efficient parking management.

· Developed Admin page from scratch using React, Bootstrap, @mui Material, Highcharts to manage online video conferencing platform

· Built video re-identification website swiftly with an intuitive, user-centric design using HTML, CSS, Javascript and Bootstrap.

· Demonstrated proficiency in developing and designing open-source video conference application, leveraging cutting-edge technologies and best practices to deliver exceptional user experience for visually impaired people.

Web Developer
Contract   **April 2022 - December 2022, Seoul, South Korea**

· Developed an intuitive online library website using React, Firebase for the Institute of Retraining of Pedagogic Personnel, improving user experience and mission alignment by reducing load time by 66% compared to the original.

Teacher Assistant
Samarkand Economics and Service Vocational College | IT Department   **October 2015 - May 2016, Samarkand, Uzbekistan**

· Collaborated with professors to deliver instructions in C and C++ programming, providing hands-on assistance and guidance to students

· Conducted code reviews, provided feedback, and helped students improve their coding skills.
